Guild Project

Road map

Our principle

Inspire through people

Our promise

Empower bold promises

Our purpose

Deliver progress to society

People

Teamwork is dreamwork

Challenged by **Technology**

Passion for **Logistics**

Guild Project

Product Owner Goals

Atlassian Jira

- Describe product with user stories
- Manage Issue's lifecycle and types (Epic, Task, Story)
- Manage Sprint lifecycle
- Create Jira workflows
- Perform Jira Issues Queries

Guild Project

Analyst Goals

Visual Paradigm

- Document product domain with Entity Relationship Diagram
- Describe product main processes with Activity Diagram
- Describe system architecture with Deploy Diagram

Implement Frontend with modern js Framework

- Create a product prototype starting from UI template
- Implement UI leveraging composition of components
- Handle user actions
- Data Management and Local state
- Test Driven Development and Unit Test Frameworks

Implement Backend with modern Framework

- Manage access to Database
- Implement business logic
- Expose service as Rest api
- Manage user roles and security
- Test Driven Development and Unit Test Frameworks

Tools for Integration Test

- ☐ Test tools to query to Database
- ☐ Test tools for Rest Api

AWS Cloud Services

- Manage users and permission to AWS Account
- Administration of Costs and services
- Administration of Database on the cloud
- Deploy and Operations of Frontend System on the cloud
- Deploy and Operations of Backend System on the cloud
